Roadshow feedback and model adjustment

The company gave an overview of its current business development at a roadshow on February 17, 2021. The following aspects of the equity story became clear:

- 2020: A slight expansion in revenue will be accompanied by a significant improvement in profitability.
- The company is one of the leading providers in its sector. RBR Global POS Software even describes GK as "the global no. 1 retail software". The importance of software in the reinvention of the retail market in competition with internet-based business models (aka Amazon) is greater than ever. At the same time, retailers in particular have sufficient financial resources to carry out projects.
- Cloud business increased massively with five new SaaS customers for the core solutions. In total, cloud contracts with a minimum order volume (TCV) of more than EUR 48m were concluded, which, as SaaS offerings, in most cases have a term of between three to ten years. A global alliance between Microsoft and GK Software now makes the company's POS Retail Solution available on Microsoft Azure. This also underlines the move towards the cloud, which is typically associated with lower upfront licenses in the short term, but predictable high margins in the long term.
- New solutions such as Deutsche Fiskal (fiscalisation) or the vertical for (US) gas stations could even offer potential above the numbers modelled below.

The aforementioned factors cast the company's valuation in a new light. After several successful quarters, the question of sustainability of profitability no longer arises. A future tendency towards a higher share of partner-licence and cloud sales leads to a lower top line with better margins. Overall, the visibility of the business model increases significantly, which could fuel a multiple expansion towards German high-quality software small caps. For now, this leads to an adjustment of the risk adjustment in the DCF model (beta from 1.7 to 1.4 with more potential once results continue to follow a stable trend). Together, the adjustment results in an increase in the target price from EUR 120 to EUR 155. **The share continues to be rated Buy.**

| Changes in E | stimates: | | | | | |
|----------------------------|----------------|--------|----------------|---------|----------------|--------|

| DPS | 0.00 | 0.0 % | 0.00 | 0.0 % | 1.50 | 0.0 % |

Comment on Changes:

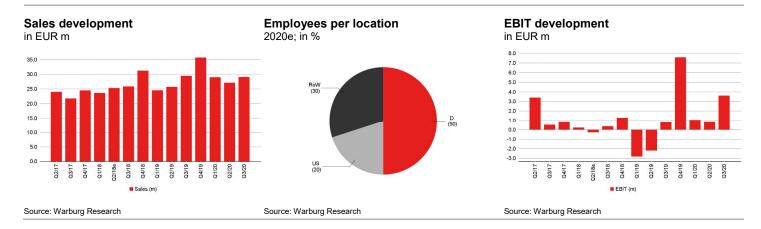

In the context of the company's current reporting, a slightly lower level of sales is planned for the 2020 financial year than initially expected. However, this is clearly offset by a strong sales quality (high license revenues). This is presumably explained by a high proportion of customers acquired via the partner SAP. These only lead to license revenues and not, as is the case with self-acquired customers, also to project revenues. This has a positive effect on the profit margin.

 In addition, significantly lower depreciation is assumed than before (2020 and beyond). This was already evident in the 9M numbers.

Analyst **Felix Ellmann** fellmann@warburg-research.com +49 40 309537-120

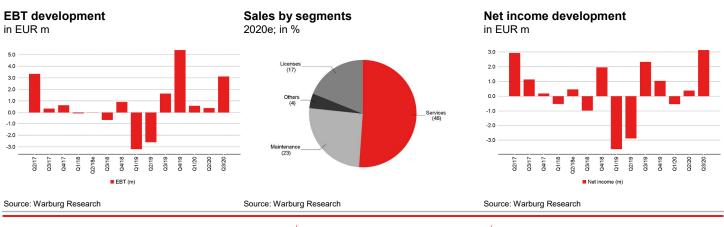

Company Background

- GK Software is the leading software supplier for retailers.
- As well as standard processes, GK Software solutions facilitate special requirements such as bonus programmes, the recording of fiscal details and the seamless integration in back-end solutions.
- The business activities of GK Software divides into two segments the sale of product licences and the corresponding services.

Competitive Quality

- The structural advantages of GK Software are compelling:
- GK Software's leading solution is completely Java-based, which makes it lean, platform independent and means it can be operated on the exisiting customer infrastructure.
- For many retail projects, GK competitors tend to undercalculate their bids and as a consequence are unable to complete the project on time and within budget.
- GK has outstanding reference clients (Hornbach, Kaufhof, Doublas, Netto, Tchibo, T-Punkt, Thalia, JYSK Nordic...)
- At the same time, GK Software's personnel costs are, depending on the location, often about 20% below those of a similar project team of a large system integrator.

LEGAL DISCLAIMER

This research report ("investment recommendation") was prepared by the Warburg Research GmbH, a fully owned subsidiary of the M.M.Warburg & CO (AG & Co.) KGaA and is passed on by the M.M.Warburg & CO (AG & Co.) KGaA. It is intended solely for the recipient and may not be passed on to another company without their prior consent, regardless of whether the company is part of the same corporation or not. It contains selected information and does not purport to be complete. The investment recommendation is based on publicly available information and data ("information") believed to be accurate and complete. Warburg Research GmbH neither examines the information for accuracy and completeness, nor guarantees its accuracy and completeness. Possible errors or incompleteness of the information do not constitute grounds for liability of M.M.Warburg & CO (AG & Co.) KGaA or Warburg Research GmbH for damages of any kind whatsoever, and M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH are not liable for indirect and/or direct and/or consequential damages. In particular, neither M.M.Warburg & CO (AG & Co.) KGaA nor Warburg Research GmbH are liable for the statements, plans or other details contained in these investment recommendations concerning the examined companies, their affiliated companies, strategies, economic situations, market and competitive situations, regulatory environment, etc. Although due care has been taken in compiling this investment recommendation, it cannot be excluded that it is incomplete or contains errors. M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH, their shareholders and employees are not liable for the accuracy and completeness of the statements, estimations and the conclusions derived from the information contained in this investment recommendation. Provided a investment recommendation is being transmitted in connection with an existing contractual relationship, i.e. financial advisory or similar services, the liability of M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH shall be restricted to gross negligence and wilful misconduct. In case of failure in essential tasks, M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH are liable for normal negligence. In any case, the liability of M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH is limited to typical, expectable damages. This investment recommendation does not constitute an offer or a solicitation of an offer for the purchase or sale of any security. Partners, directors or employees of M.M.Warburg & CO (AG & Co.) KGaA, Warburg Research GmbH or affiliated companies may serve in a position of responsibility, i.e. on the board of directors of companies mentioned in the report. Opinions expressed in this investment recommendation are subject to change without notice. All rights reserved.

This applies, in particular, to reproductions, translations, microfilming, and storage and processing on electronic media of the entire content or parts thereof.

DISCLOSURE ACCORDING TO §85 OF THE GERMAN SECURITIES TRADING ACT (WPHG), MAR AND MIFID II INCL. COMMISSION DELEGATED REGULATION (EU) 2016/958 AND (EU) 2017/565

The valuation underlying the investment recommendation for the company analysed here is based on generally accepted and widely used methods of fundamental analysis, such as e.g. DCF Model, Free Cash Flow Value Potential, NAV, Peer Group Comparison or Sum of the Parts Model (see also <u>http://www.mmwarburg.de/disclaimer/disclaimer.htm#Valuation</u>). The result of this fundamental valuation is modified to take into consideration the analyst's assessment as regards the expected development of investor sentiment and its impact on the share price.

Independent of the applied valuation methods, there is the risk that the price target will not be met, for instance because of unforeseen changes in demand for the company's products, changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rate etc. For investments in foreign markets and instruments there are further risks, generally based on exchange rate changes or changes in political and social conditions.

This commentary reflects the opinion of the relevant author at the point in time of its compilation. A change in the fundamental factors underlying the valuation can mean that the valuation is subsequently no longer accurate. Whether, or in what time frame, an update of this commentary follows is not determined in advance.

Additional internal and organisational arrangements to prevent or to deal with conflicts of interest have been implemented. Among these are the spatial separation of Warburg Research GmbH from M.M.Warburg & CO (AG & Co.) KGaA and the creation of areas of confidentiality. This prevents the exchange of information, which could form the basis of conflicts of interest for Warburg Research GmbH in terms of the analysed issuers or their financial instruments.

The analysts of Warburg Research GmbH do not receive a gratuity – directly or indirectly – from the investment banking activities of M.M.Warburg & CO (AG & Co.) KGaA or of any company within the Warburg-Group.

All prices of financial instruments given in this investment recommendation are the closing prices on the last stock-market trading day before the publication date stated, unless another point in time is explicitly stated.

M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH are subject to the supervision of the Federal Financial Supervisory Authority, BaFin. M.M.Warburg & CO (AG & Co.) KGaA is additionally subject to the supervision of the European Central Bank (ECB).
